Sprinkler Meter Procedure

- 1) Obtain a Plumbing Permit-Plumbing permits are purchased from Crawford County, for more information about plumbing permits, call: (989) 344-3233.
- 2) Separate Plumbing-You (the customer) will need to arrange to have all plumbing associated with the secondary meter reconfigured so that it is limited to usage outside of the home only (hose bibs and underground irrigation systems). A $\frac{3}{4}$ " meter installation, which is the correct size meter for a sprinkler system having continuous flows of a maximum of 15 gallons per minute. This size meter is the one that has typically been installed, to date within the City of Grayling.
- 3) Pay for meter and schedule installation-Once the plumbing has been separated, contact the City Water/Sewer Department at (989) 348-2131 to pay for the meter/horns and to schedule an appointment for the meter to be installed. The fee for the sprinkler meter is actual cost of the meter requested. The fee is based on the size meter that is correct for a sprinkler system.

(i.e. Residential $\frac{3}{4}$ " Metron Meter \$345.00 + Meter Horns \$72.16=\$417.16)
